Dear Hiring Manager,

I am excited to apply for the Engineering Manager, Infrastructure (Developer Enablement) position at Angi. Your mission to empower developers with efficient, reliable tools and systems resonates deeply with me. I am inspired by the opportunity to lead a team focused on building great developer experiences and shaping the foundation that enables rapid, reliable product delivery for Angi's platform.

Why I'm Excited About Angi

Angi's commitment to operational excellence, developer-centric solutions, and continuous improvement aligns perfectly with my passion for building scalable, self-service infrastructure and intuitive developer tooling. The chance to make a real impact on developer productivity and the home services industry is especially motivating.

Relevant Experience & Impact

Infrastructure, Developer Tooling & Automation - Over 20 years of experience in infrastructure engineering, developer enablement, and platform tooling for enterprise and SMB clients (Barclays, McKinsey, Biophy, Yotascale, Boomi, etc.) - Deep hands-on expertise with Kubernetes, Terraform, AWS, and Golang, including building custom Kubernetes operators/controllers and automating developer workflows - Designed, built, and maintained tools and services that enhance developer experience, simplify complex infrastructure interactions, and drive adoption of self-service capabilities

Technical Leadership & Team Building - Built and led high-performing engineering teams, recruiting, mentoring, and developing engineers to focus on developer enablement and operational excellence - Advocated for software engineering best practices and developer-centric solutions, instilling a culture of continuous improvement and feedback - Planned and shaped the future of

developer tooling, using data-driven approaches to understand pain points and prioritize improvements

Cross-Functional Collaboration & Communication - Collaborated closely with developers, infrastructure, and product teams to gather feedback, iterate on tools, and deliver seamless developer experiences - Built dashboards and metrics to monitor tool usage and identify areas for improvement - Practiced excellent communication and remote-friendly working practices, tailoring communication to diverse technical audiences

Why I'm a Strong Fit for Angi

My experience in infrastructure engineering, developer tooling, and technical leadership, combined with my passion for enabling developers and simplifying complex systems, positions me to make a significant impact at Angi. I thrive in environments that value developer productivity, operational excellence, and continuous improvement, and am eager to help Angi build the future of home services technology.

Thank you for considering my application. I look forward to the opportunity to discuss how my background and vision align with Angi's mission and how I can contribute to your continued success.

Sincerely,

Yongjun Rong
