Black Box Hiring Team

Dear Black Box Hiring Team,

I am excited to apply for the Engineering Director position at Black Box. With over two decades of experience in software engineering and technical leadership—including extensive work in AI-powered SaaS platforms, large language models (LLMs), and agent-based AI systems—I am passionate about driving innovation, building high-performing teams, and delivering secure, scalable enterprise solutions.

Throughout my career, I have:

- Led the architecture and delivery of cloud-native, enterprise-grade platforms, ensuring security, scalability, and operational excellence.
- Directed GenAI, RAG, and multi-agent AI projects, integrating advanced AI/ML features into production systems.
- Collaborated closely with Product, Data Science/ML, DevOps, and UX teams to deliver seamless AI integration and impactful user experiences.
- Implemented and enforced engineering best practices, including Agile, CI/CD, and DevOps methodologies, to accelerate delivery and maintain high quality standards.
- Fostered a culture of innovation, ownership, and continuous improvement, mentoring engineers and developing future leaders.

I am adept at aligning technical strategy with business objectives, overseeing architectural decisions for platform scalability and security, and staying current with emerging AI technologies and methodologies. My experience spans both large enterprises and high-growth organizations, and I thrive in environments that demand both strategic vision and hands-on leadership.

I am inspired by Black Box's mission to deliver best-in-class IT solutions and would be honored to contribute my expertise in AI, cloud-native architecture, and engineering leadership to your team. I look forward to the opportunity to discuss how I can help drive your technical roadmap and empower your engineering teams to achieve ambitious goals.

Thank you for your consideration.

Sincerely,
Yongjun Rong
