Hiring Manager
CAQH

Subject: Application for Sr. Director, Data Engineering & Architecture Position

Dear Hiring Manager,

I am excited to apply for the Sr. Director, Data Engineering & Architecture role at CAQH. With over two decades of hands-on experience in cloud-native architecture, data engineering, and digital transformation, I am eager to contribute my expertise to your mission of modernizing healthcare data ecosystems. My background aligns seamlessly with the responsibilities outlined for this role, particularly in designing scalable data architectures, leading cloud modernization, and fostering data-driven decision-making.

Why I Am a Strong Fit for This Role

Enterprise Data Architecture & Engineering Leadership

- As Director of Cloud Architecture at Biophy, I designed and implemented a comprehensive Infrastructure as Code (IaC) framework for AWS, aligning with best practices and ensuring scalability, security, and automation.
- At McKinsey & Company, I led the development of genAI systems with Retrieval-Augmented Generation (RAG) and multi-agent frameworks to accelerate mainframe migration and data pipeline development on PySpark and Databricks.
- My work at Yotascale involved architecting a cross-cloud cost analytics platform, integrating AWS, Azure, and GCP data sources to deliver actionable insights.

Cloud Modernization & Data Tooling

- I have extensive experience with cloud-native technologies, including Azure, AWS (Lambda, EventBridge, SQS, SNS), Snowflake, and modern data engineering tools like Terraform, dbt, and Airflow.
- At Barclays, I directed the migration of 500+ on-premises applications to AWS, optimizing cost, performance, and scalability while ensuring compliance with regulatory standards.

Data Integration & Interoperability

- I engineered event-driven architectures (EDA) and real-time data pipelines using Kafka, EventBridge, and Lambda, ensuring data lineage and traceability.
- My integration work with healthcare-adjacent systems (e.g., SAP, Oracle ERP) demonstrates my ability to align data standards with business needs.

Collaboration & Thought Leadership

- I have a proven track record of mentoring high-performing teams, establishing best practices, and collaborating with cross-functional stakeholders to align data initiatives with strategic goals.
- My certifications and hands-on experience with HIPAA, GDPR, and other compliance frameworks ensure that data governance is embedded in every solution.

Alignment with CAQHs Mission

CAQHs vision to streamline healthcare data resonates deeply with my passion for building scalable, interoperable systems that drive efficiency and innovation. My expertise in cloud-native architectures, data lake/warehouse development, and AI-powered data pipelines positions me to lead your enterprise data strategy effectively.

I would welcome the opportunity to discuss how my skills and experiences can contribute to CAQHs success. Thank you for your time and consideration. I look forward to the possibility of joining your team.

Best regards,
Yongjun Rong
