Coinbase

Dear Hiring Manager,

I am excited to apply for the Senior Staff Software Engineer, Trading Systems position at Coinbase. Your mission to increase economic freedom in the world through the power of crypto and blockchain technology resonates deeply with me. I am inspired by the opportunity to help build the future global financial system and to work alongside a team that values technical excellence, high ownership, and relentless pursuit of impact.

Why I'm Excited About Coinbase

Coinbase's vision of building the fastest, easiest, and most trusted crypto trading platform aligns perfectly with my background in architecting and delivering large-scale, mission-critical trading and financial systems. I am passionate about leveraging technology to drive innovation in financial markets and to empower individuals and organizations with greater access and control over their assets.

Relevant Experience & Impact

Distributed Systems & Trading Infrastructure - Over 20 years of experience building and shipping large-scale distributed systems in highly regulated, high-stakes environments (Barclays, McKinsey, Biophy, Yotascale, Boomi, etc.) - Led the architecture and delivery of order management, execution, and risk management systems for enterprise clients, with a focus on reliability, performance, and compliance - Deep hands-on experience with cloud-native infrastructure (AWS, Kubernetes, Docker), microservices, and event-driven architectures

Technical Leadership & Mentorship - Drove technical vision and execution for multi-quarter, cross-team initiatives, influencing product strategy and long-term technical bets - Mentored and coached senior engineers, established technical standards, and led architecture review boards - Elevated engineering quality through design/code reviews and promoting best practices

Product & Customer Focus - Customer-obsessed approach to technical decision-making, with strong product intuition and a track record of translating business needs into robust, scalable solutions - Collaborated closely with Product,

Design, and business stakeholders to align technical direction with product strategy

Financial Systems & Crypto - Experience building trading, risk, and analytics systems for financial services clients, including equities and derivatives - Familiarity with compliance, auditability, and regulated environments - Deep interest in crypto, blockchain, and onchain activity, with a passion for learning and contributing to the next generation of financial protocols

Why I'm a Strong Fit for Coinbase

My experience leading the design and delivery of distributed trading systems, combined with my technical depth and passion for financial innovation, positions me to make a significant impact on Coinbase's Consumer Trading team. I thrive in high-velocity, high-stakes environments and am eager to help define and deliver the next generation of trading infrastructure that will power economic freedom for millions of users worldwide.

Thank you for considering my application. I look forward to the opportunity to discuss how my background and vision align with Coinbase's mission and how I can contribute to your continued success.

Sincerely,

Yongjun Rong
