Fastly

Dear Hiring Manager,

I am excited to apply for the Engineering Manager, Platform Trust & Orchestration position at Fastly. Your mission to build a more trustworthy Internet and deliver secure, reliable, and innovative edge cloud solutions resonates deeply with me. I am inspired by the opportunity to lead a high-performing team responsible for the foundational infrastructure that powers a significant portion of global internet traffic.

Why I'm Excited About Fastly

Fastly's commitment to innovation, security, and reliability at the edge aligns perfectly with my passion for architecting and operating distributed systems that enable agile software development and world-class digital experiences. The chance to drive strategic improvements and shape the future of secure orchestration and trust services is especially motivating.

Relevant Experience & Impact

Platform Engineering, SRE & Distributed Systems - Over 20 years of experience designing, building, and operating distributed systems and infrastructure for enterprise and SMB clients (Barclays, McKinsey, Biophy, Yotascale, Boomi, etc.) - Led and managed SRE and platform engineering teams, fostering a culture of innovation, reliability, and security - Deep hands-on experience with infrastructure as code (Terraform, Chef, Ansible), Linux system internals, and performance optimization - Built and automated large-scale production infrastructure in both public cloud and on-prem environments, including workload migrations and system orchestration

PKI, Secrets Management & Security - Designed and implemented secrets and workload identity management solutions using tools like HashiCorp Vault, SPIFFE, and SPIRE - Experience with PKI, certificate management, and secure automation for mission-critical systems - Collaborated with compliance and security teams to ensure robust, auditable infrastructure

Technical Leadership & Cross-Functional Collaboration - Owned technical roadmaps for platform and trust systems, driving continuous improvement and durable technical strategy - Mentored and grew distributed engineering teams, supporting operational success and advancing self-service tooling initiatives - Partnered with cross-functional stakeholders using a product-owner mindset to define clear priorities and deliver impactful results - Communicated effectively with both technical and non-technical audiences, setting expectations for roadmaps and deliverables

Why I'm a Strong Fit for Fastly

My experience leading SRE and platform engineering teams, combined with my technical depth in distributed systems, PKI, and infrastructure automation, positions me to make a significant impact at Fastly. I thrive in innovative, high-stakes environments and am eager to help Fastly evolve its platform to deliver secure, reliable, and scalable solutions for customers worldwide.

Thank you for considering my application. I look forward to the opportunity to discuss how my background and vision align with Fastly's mission and how I can contribute to your continued success.

Sincerely,

Yongjun Rong
