Hopscotch Primary Care

[Company Address]

[City, State ZIP]

Dear Hiring Manager,

I am excited to apply for the Senior Director of Engineering position at Hopscotch Primary Care. Your mission to transform healthcare in rural America and provide high-quality, accessible primary care resonates deeply with me. I am inspired by the opportunity to lead Platform and Data Engineering teams at a pivotal moment in your growth, building the technical foundation that powers your data-driven care model and clinical operations.

Why I'm Excited About Hopscotch Primary Care

Hopscotch's commitment to serving rural communities and delivering patient-centered care aligns perfectly with my passion for building scalable, secure, and high-performing technology solutions that make a meaningful impact. The chance to work with Product, Clinical, and Operations teams to shape the technology roadmap and support your value-based care model is especially motivating.

Relevant Experience & Impact

Healthcare Technology & Platform Engineering - Over 20 years of technical experience, including 5+ years managing engineering teams in healthcare and regulated industries (Barclays, McKinsey, Biophy, Yotascale, Boomi, etc.) - Experience leading hybrid models of in-house development and vended solutions, balancing strategic needs with available resources - Deep understanding of healthcare data sources, clinical workflows, and regulatory requirements for patient data and privacy

Technical Leadership & Team Development - Led, mentored, and grew high-performing platform and data engineering teams, fostering a culture of technical excellence, accountability, and continuous learning - Developed comprehensive technical strategies that align with business vision and enable scalable growth across new markets - Oversaw the design and implementation of scalable, secure, and high-performing infrastructure and data pipelines

Cross-Functional Collaboration & Strategic Execution - Partnered closely with Product, Operations, Growth, and Clinical teams to define and drive technology roadmaps - Translated company objectives into engineering roadmaps with clear milestones, resourcing, and metrics - Enabled faster experimentation and decision-making through self-serve data and infrastructure tools

Healthcare & Data Expertise - Experience working with healthcare data sources, EHR systems, population health tools, and clinical decision support technology - Hands-on experience with SQL, Python, dbt, and AWS infrastructure as code (IaC) tools - Built and maintained data platforms and analytics systems that support clinical operations and patient engagement

Why I'm a Strong Fit for Hopscotch Primary Care

My experience leading engineering teams in healthcare and regulated environments, combined with my technical depth in platform and data engineering, positions me to make a significant impact at Hopscotch. I thrive in fast-paced, high-growth environments and am eager to help Hopscotch scale its technology infrastructure to serve more patients and communities.

Thank you for considering my application. I look forward to the opportunity to discuss how my background and vision align with Hopscotch's mission and how I can contribute to your continued success.

Sincerely,

Yongjun Rong
