Dear Hiring Manager,

I am excited to apply for the Tech Lead II position on the Schemas Backend team at HubSpot. Your mission to ensure data consistency and reliability across a highly distributed, event-driven architecture resonates deeply with me. I am inspired by the opportunity to lead a team building foundational systems that empower both internal development and customer-facing features at scale.

Why I'm Excited About HubSpot

HubSpot's commitment to technical excellence, open source innovation, and inclusive culture aligns perfectly with my own values and experience. I am passionate about building and scaling backend infrastructure that solves complex constraint satisfaction problems, ensures data integrity, and supports rapid product innovation. The chance to work on schema management, validation, and distributed systems at the heart of HubSpot's platform is especially motivating.

Relevant Experience & Impact

Distributed Systems & Schema Management - Over 20 years of experience designing, building, and maintaining distributed systems and backend infrastructure for enterprise and SMB clients (Barclays, McKinsey, Biophy, Yotascale, Boomi, etc.) - Led the architecture and delivery of schema validation, data consistency, and configuration management systems across microservices and event-driven pipelines - Deep hands-on experience with Java, Kafka, Spark, MySQL, and open source technologies for large-scale data processing and storage - Built and optimized dependency managers, build orchestrators, and configuration managers to support reliable, scalable platforms

Technical Leadership & Mentorship - Served as a player-coach, leading small teams and collaborating with Product, Design, and other Tech Leads to set and achieve challenging goals - Mentored and grew engineers, fostering a culture of technical rigor, ownership, and continuous learning - Proactively managed

on-call health, product reliability, and quality, driving operational excellence across teams - Evaluated team performance, provided coaching and learning opportunities, and cultivated diverse, inclusive teams

Product & Customer Focus - Developed strong opinions about product direction, actively contributing to the leadership triad and co-setting team strategy - Maintained a customer-centric attitude, ensuring backend systems support both internal and external needs - Worked across teams to resolve cross-team issues and deliver impactful solutions in complex architectural spaces

Why I'm a Strong Fit for HubSpot

My experience leading distributed systems teams, combined with my technical depth in schema management and my passion for mentoring and product innovation, positions me to make a significant impact on HubSpot's Schemas Backend team. I thrive in collaborative, fast-paced environments and am eager to help HubSpot continue to scale its platform and deliver reliable, high-quality solutions for customers.

Thank you for considering my application. I look forward to the opportunity to discuss how my background and vision align with HubSpot's mission and how I can contribute to your continued success.

Sincerely,

Yongjun Rong
