[Company Address]

[City, State ZIP]

Dear Hiring Manager,

I am excited to apply for the Solutions Architect – Payments position at Interop Labs, the core development team behind the Axelar network. Your mission to build secure, scalable interoperability solutions for next-generation stablecoin and digital payment use cases resonates deeply with me. I am inspired by the opportunity to help shape the future of programmable payments and to bridge the gap between traditional financial infrastructure and decentralized technology.

Why I'm Excited About Interop Labs & Axelar

Interop Labs' focus on interoperability, programmability, and security as foundational pillars for Web3 aligns perfectly with my passion for building robust, future-proof financial infrastructure. The chance to work with a world-class team and a diverse partner ecosystem to deliver high-impact solutions at the intersection of payments and blockchain is especially motivating.

Relevant Experience & Impact

Payments Infrastructure & Blockchain Expertise - Over 20 years of experience in technical solution architecture and engineering roles for global payments, fintech, and financial infrastructure companies (Barclays, McKinsey, Biophy, Yotascale, Boomi, etc.) - Deep understanding of payment processing flows, settlement systems, compliance (KYC, AML), and FX/liquidity operations - Hands-on experience designing and implementing APIs and SDKs for payment and treasury products, with a focus on resilience, latency, and compliance - Familiarity with stablecoin ecosystems, blockchain protocols, and smart contract platforms (Ethereum, Cosmos SDK, etc.)

Cross-Chain & Interoperability Solutions - Led the design and integration of cross-chain and multi-protocol solutions, enabling secure, scalable interoperability between traditional and decentralized systems - Architected and delivered

solutions for real-time payments, cross-border transactions, and tokenized assets, collaborating with protocol, product, and partner teams

Technical Leadership & Stakeholder Management - Served as the technical liaison for partners, translating business requirements into secure, scalable implementations - Created and maintained technical documentation, SDK references, and demo applications for payment-related use cases - Supported go-to-market efforts with solution diagrams, reference architectures, and integration plans - Represented organizations in technical forums, partner calls, and developer communities focused on digital payments

Why I'm a Strong Fit for Interop Labs

My experience architecting and integrating payment infrastructure, combined with my technical depth in blockchain and cross-chain solutions, positions me to make a significant impact at Interop Labs. I thrive in fast-paced, high-autonomy environments and am eager to help deliver secure, scalable solutions that unlock new forms of payment infrastructure onchain and across chains.

Thank you for considering my application. I look forward to the opportunity to discuss how my background and vision align with Interop Labs' mission and how I can contribute to your continued success.

Sincerely,

Yongjun Rong
