Milliman IntelliScript

Dear Hiring Manager,

I am excited to apply for the Site Reliability Engineer III position at Milliman IntelliScript. Your mission to deliver category-defining, data-driven SaaS products for insurance, health IT, and life sciences clients resonates deeply with me. I am inspired by the opportunity to serve as the go-to authority for PostgreSQL database management and optimization, and to help drive innovation, reliability, and excellence across your data platforms.

Why I'm Excited About Milliman IntelliScript

Milliman's culture of innovation, collaboration, and continuous learning aligns perfectly with my passion for building high-quality, secure, and scalable database systems. The chance to work with a diverse team of experts and contribute to impactful SaaS solutions in regulated industries is especially motivating.

Relevant Experience & Impact

PostgreSQL, AWS, and Data Platform Integration - Over 20 years of experience architecting, implementing, and optimizing PostgreSQL databases, including advanced features, performance tuning, and PL/pgSQL development - Deep hands-on expertise with AWS services (RDS, EC2, S3, Lambda, DynamoDB), IAM security, and infrastructure as code (Terraform) - Designed and implemented observability strategies, dashboards, and alerting using Datadog and AWS tools for real-time visibility and anomaly detection - Integrated and optimized data platforms including DynamoDB, OpenSearch, DocumentDB, Redis, Kafka, and Amazon SQS

Security, Troubleshooting, and Support - Implemented robust IAM policies, conducted security audits, and collaborated with security teams to address vulnerabilities and ensure compliance - Provided expert-level support for database-related issues, performed root cause analysis, and implemented long-term solutions for recurring problems - Experience in environments subject to HIPAA/PCI regulations, with a strong focus on data governance and quality

Mentorship, Training, and Collaboration - Mentored and trained database administrators and developers, delivering training sessions and documentation on best practices and new technologies - Collaborated with development teams to optimize application performance and facilitate data integration and ETL processes - Strong communicator, able to translate specs and business needs between stakeholders and technical teams

Why I'm a Strong Fit for Milliman IntelliScript

My experience in PostgreSQL, AWS, data platform integration, and observability, combined with my passion for security, troubleshooting, and mentorship, positions me to make a significant impact as a Site Reliability Engineer III at Milliman IntelliScript. I thrive in collaborative, customer-centric environments and am eager to help Milliman deliver reliable, high-quality SaaS solutions for your clients.

Thank you for considering my application. I look forward to the opportunity to discuss how my background and vision align with Milliman's mission and how I can contribute to your continued success.

Sincerely,

Yongjun Rong
