SmarterDx

Dear Hiring Manager,

I am excited to apply for the Senior Platform Engineer position at SmarterDx. Your mission to optimize healthcare operations and enhance care quality through clinical AI resonates deeply with me. I am inspired by the opportunity to architect, build, and operate a development platform that empowers teams to deliver impactful products and services in the healthcare sector.

Why I'm Excited About SmarterDx

SmarterDx's commitment to leveraging AI for better patient outcomes and operational efficiency aligns perfectly with my passion for building secure, scalable, and reusable platform capabilities. The chance to contribute to a platform that supports hospitals in recovering revenue and improving care quality is especially motivating.

Relevant Experience & Impact

Platform Engineering & Cloud Infrastructure - Over 20 years of experience in backend and cloud-based development, building reusable and scalable system capabilities for enterprise and SMB clients (Barclays, McKinsey, Biophy, Yotascale, Boomi, etc.) - Deep hands-on expertise with AWS, Terraform, and Kubernetes, including building, deploying, maintaining, and monitoring common infrastructure - Experience developing Kubernetes custom controllers in Go and deploying common libraries in Python and Typescript for data, observability, and monitoring systems

Security, SRE, and Production Support - 3+ years working in security-conscious environments, collaborating closely with Security Engineering to build secure patterns into system design - Applied SRE mindset and toolkit to support production platforms, ensuring reliability, observability, and rapid incident response

Continuous Improvement & Collaboration - Advocated for and implemented improved techniques, processes, and designs within platform engineering

teams - Supported cross-functional teams by building secure, scalable, and reusable platform capabilities

Healthcare & Data Engineering (Nice to Haves) - Experience with ETL/ELT processes, AirFlow, dbt, and data warehouses such as Snowflake
- Exposure to healthcare data and operations, with a passion for improving healthcare outcomes through technology

Why I'm a Strong Fit for SmarterDx

My experience in platform engineering, cloud infrastructure, and secure system design, combined with my technical depth in AWS, Kubernetes, Terraform, Go, and Python, positions me to make a significant impact at SmarterDx. I thrive in environments that value innovation, security, and operational excellence, and am eager to help SmarterDx optimize healthcare operations and deliver better patient outcomes.

Thank you for considering my application. I look forward to the opportunity to discuss how my background and vision align with SmarterDx's mission and how I can contribute to your continued success.

Sincerely,

Yongjun Rong
