Stability AI Hiring Team

Dear Hiring Team,

I am excited to apply for the Head of Engineering position. With over two decades of experience in software engineering and technical leadership—including extensive work in AI, machine learning, and cloud infrastructure—I am passionate about driving innovation, building high-performing teams, and delivering impactful AI-powered solutions.

Throughout my career, I have:

- Led and scaled engineering teams in both startup and enterprise environments, including roles as Director of Cloud Architecture, VP/Lead Architect, and Senior Cloud Engineer at organizations such as Biophy, McKinsey & Company, Barclays, and Oracle.
- Delivered GenAI, RAG, and multi-agent AI systems, and overseen the deployment of LLMs and agentic frameworks in production.
- Built and owned full-stack products using Python, Typescript, Java, and Node.js, and architected robust, scalable cloud solutions on AWS, GCP, and Azure.
- Implemented MLOps pipelines, CI/CD, and modern development methodologies to ensure rapid, reliable delivery of AI and data-driven products.
- Fostered a culture of technical excellence, mentorship, and continuous improvement, while collaborating closely with Product, Research, and Operations to translate AI innovations into market-ready solutions.
- Maintained a strong focus on security, compliance, and ethical AI practices, and kept teams at the forefront of emerging technologies and industry trends.

I am adept at defining and executing engineering roadmaps aligned with business objectives, establishing KPIs to measure effectiveness, and partnering with leadership to drive hiring strategies and organizational growth. My academic background includes a Master's in Computer Science and a Master's in Engineering, providing a strong foundation in both theory and practice.

I am inspired by Stability AI's mission to lead in AI innovation and would be honored to contribute my experience in scaling teams, delivering AI solutions, and fostering a culture of excellence. I look forward to the opportunity to discuss how I can help drive your technical strategy and empower your engineering teams to achieve ambitious goals.

Thank you for your consideration.

Sincerely,
Yongjun Rong
