Dear Hiring Manager,

I am excited to apply for the Engineering Manager, Turbopack position at Vercel. Your mission to empower developers to build, scale, and secure the modern web resonates deeply with me. I am inspired by the opportunity to lead the team building Turbopack, a foundational technology for the AI-native web, and to help shape the future of developer tooling and performance at scale.

Why I'm Excited About Vercel

Vercel's commitment to technical excellence, developer experience, and open-source innovation aligns perfectly with my own values and experience. I am passionate about building high-impact platforms and tools that enable developers to ship faster, more reliable products. The chance to work on Turbopack, collaborate with the Next.js and infrastructure teams, and drive the evolution of frontend tooling is especially motivating.

Relevant Experience & Impact

Developer Tooling & Systems Engineering - Over 20 years of experience building and scaling developer platforms, build systems, and automation tools for enterprise and SMB clients (Barclays, McKinsey, Biophy, Yotascale, Boomi, etc.) - Led the architecture and delivery of CI/CD pipelines, build automation, and code transformation systems, optimizing for performance, reliability, and developer ergonomics - Deep hands-on experience with JavaScript/TypeScript tooling, compilers, and large-scale build pipelines - Experience with Rust, Python, and systems-level engineering for high-performance developer tools

Technical Leadership & Team Building - Managed and mentored high-performing engineering teams, fostering a culture of technical rigor, product ownership, and fast iteration - Drove technical direction and execution for complex, cross-functional projects, balancing product delivery with long-term platform investments - Collaborated closely with product, design, and engineering

teams to align technical solutions with developer needs and business goals - Advocated for great developer experience and thoughtful abstraction across the stack

Open Source & Community Engagement - Contributed to and led open-source initiatives, engaging with the broader developer community to inform roadmap priorities and technical decisions - Built strong relationships with internal and external stakeholders to drive adoption and impact

Why I'm a Strong Fit for Vercel

My experience leading the design and delivery of developer tooling, combined with my technical depth in systems engineering and my passion for empowering developers, positions me to make a significant impact on the Turbopack team. I thrive in collaborative, fast-paced environments and am eager to help Vercel scale its platform and shape the future of the web.

Thank you for considering my application. I look forward to the opportunity to discuss how my background and vision align with Vercel's mission and how I can contribute to your continued success.

Sincerely,

Yongjun Rong
