Hiring Manager
Affirm

Remote, US

Dear Hiring Manager,

I am thrilled to apply for the Staff Software Engineer, Backend (CI/CD) position at Affirm, where my expertise in **Python**, **Kotlin**, **AWS**, **Kubernetes**, and **Jenkins** aligns with your mission to streamline software development for transparent financial solutions. With a Master of Computer Science from Texas Tech University (GPA: 4.0/4.0) and over 20 years of experience, I excel at building scalable CI/CD pipelines and automation frameworks.

At Biophy (2025-Present), I architected a **Python** and **Terraform**-based IaC framework on **AWS** (EKS, S3, Lambda), integrating **Jenkins** pipelines to automate deployments, reducing lead time by 40%. At Comcast (2010-2014), I built an **AutoBuild** system for 200+ microservices using **Python**, **Ruby**, and **Bamboo**, achieving 90% test coverage with automated testing. At Yotascale (2020-2021), I developed **Kubernetes**-based **Python** microservices and **MySQL** integrations, optimizing cross-cloud pipelines. At McKinsey (2021-2025), I leveraged **Kotlin** and **FastAPI** for scalable APIs, enhancing developer productivity.

I've driven technical strategies, mentored engineers via pair programming, and set code quality standards through tech talks. My open-source JSON resume project reflects my commitment to clear, high-quality code. I am eager to accelerate Affirm's CI/CD innovation, ensuring reliable deployments. Please contact me at 856-408-4027 or rongyj@hotmail.com.

Sincerely,
Yongjun Rong
