Hiring Manager
Affirm
[Company Address]
Remote, US

Dear Hiring Manager,

I am excited to apply for the Staff Software Engineer, Backend (Code to Environments) position at Affirm, where my expertise in **Python**, **Kotlin**, **AWS**, **Kubernetes**, and **Jenkins** aligns with your mission to accelerate software development for transparent financial solutions. With a Master of Computer Science from Texas Tech University (GPA: 4.0/4.0) and over 20 years of experience, I have a proven track record of building scalable CI/CD pipelines and developer environments.

At Biophy (2025-Present), I architected a **Python** and **Terraform**-based IaC framework on **AWS** (EKS, S3, Lambda), integrating **Jenkins** pipelines to automate ephemeral dev environments, reducing deployment times by 40%. At Comcast (2010-2014), I developed an **AutoBuild** system for 200+ microservices using **Python**, **Ruby**, and **Bamboo**, implementing automated testing and dependency management with **MySQL**, achieving 90% test coverage. At Yotascale (2020-2021), I built **Kubernetes**-based **Python** microservices for cross-cloud (**AWS**, **GCP**, **Azure**) pipelines, enhancing developer productivity. At McKinsey (2021-2025), I optimized **Kotlin** and **FastAPI** APIs, streamlining release engineering.

I've set technical strategies, mentored engineers through pair programming, and driven code quality via tech talks. My open-source JSON resume project showcases my commitment to clear, high-quality code. I am eager to empower Affirm's 900+ engineers with robust CI/CD solutions. Please contact me at 856-408-4027 or rongyj@hotmail.com.

Sincerely,
Yongjun Rong
