Hiring Manager
Affirm

Remote, US

Dear Hiring Manager,

I am thrilled to apply for the Principal Software Engineer, Infrastructure Platform Engineering position at Affirm. With over 20 years of experience in architecting and leading large-scale infrastructure platforms, I am eager to contribute to Affirm's mission of delivering transparent financial solutions by building robust, scalable systems that empower engineers and serve millions of customers.

At **Biophy (2025-Present)**, I led the transformation of **AWS** infrastructure using **Terraform** and **Python**, implementing modular **IaC** for **EKS**, **S3**, and **Lambda**, reducing deployment times by 40% . My work on an **AI-powered RAG platform** utilized **Kubernetes**, **Docker**, and **PostgreSQL**, ensuring scalability for millions of data points. At **Comcast (2010-2014)**, I designed **CI/CD pipelines** with **Jenkins**, **Bamboo**, and **Ruby**, automating deployments for 200+ microservices, achieving 90% test coverage. At **McKinsey (2021-2025)**, I spearheaded cloud migrations to **AWS**, **GCP**, and **Azure**, integrating **FastAPI** and **Node.js** microservices, enhancing developer productivity. My open-source **JSON resume project** demonstrates my ability to deliver clean, maintainable code using **Node.js** and **JavaScript**.

As a leader, I've mentored high-potential engineers, defined technical strategies, and driven innovation through tech talks and pair programming. My experience in **Fintech** at **IBM China (1998-2000)**, building secure payment systems with **Java** and **WebSphere**, aligns with Affirm's B2C and B2B focus. I am passionate about fostering a meritocratic culture and delivering infrastructure that balances reliability, cost, and developer delight.

I am excited to bring my expertise in **CI/CD**, **containerization**, and **cloud architecture** to Affirm. Please contact me at 856-408-4027 or rongyj@hotmail.com to discuss how I can contribute to your team's success.

Sincerely,
Yongjun Rong
