Hiring Manager
Affirm
[Company Address]
Remote, US

Dear Hiring Manager,

I am thrilled to apply for the Staff Software Engineer - SRE, Backend (Reliability Engineering) position at Affirm. With a Master of Computer Science from Texas Tech University (GPA: 4.0/4.0) and over 20 years of experience in site reliability and backend systems, I am eager to drive Affirm's mission of delivering transparent financial solutions through robust, scalable systems.

At Biophy (2025-Present), I designed a **Python** and **Terraform**-based IaC framework on **AWS** (EKS, S3, Lambda), automating deployments and implementing **AWS CloudWatch** alerting, improving system uptime by 40%. At Comcast (2010-2014), I built high-availability clusters with **Kubernetes**, **MySQL**, and **HAProxy**, ensuring zero-downtime for 200+ microservices. My **Spark**-based analytics at McKinsey (2021-2025) enhanced observability, aligning with Affirm's SLO and monitoring goals.

I excel at setting technical strategies, mentoring engineers, and fostering cross-team collaboration. At Yotascale (2020-2021), I standardized **OpenAPI/Swagger** for **Kubernetes**-based microservices, driving operational excellence. I am excited to enhance Affirm's reliability practices, ensuring seamless customer experiences.

Please contact me at 856-408-4027 or rongyj@hotmail.com to discuss further.

Sincerely,
Yongjun Rong
