Subject: Staff Software Engineer Application Scaling Beautiful.ai's Visual Storytelling Platform Dear

Beautiful.ai Hiring Team,

As a full-stack architect with over seven years of experience building intuitive visual tools using React, Node.js, and MongoDB, I was thrilled to discover your Staff Software Engineer opening. My background aligns perfectly with your mission to democratize beautiful presentations—particularly my work on SVG-driven interfaces, performance optimization, and mentoring engineers to ship impactful features. I'm confident I can accelerate Beautiful.ai's technical vision while elevating your engineering standards.

Here's how I address your core needs:

1. Full-Stack Technical Leadership

- Led development of SVG-rich design interfaces (similar to Beautiful.ai) at McKinsey using React/TypeScript, reducing rendering latency by 70% through Webpack optimizations and virtualized layouts.
- Architected Node.js microservices (Express) for real-time collaboration features at Barclays, handling 50,000+ concurrent users with Firebase/MongoDB.

2. Performance & Scalability

- Optimized CI/CD pipelines at Comcast for 200+ microservices, cutting deployment time from 45 to 5 minutes—directly transferable to enhancing your GCP infrastructure.
- Designed distributed WebSocket systems for live presentation co-editing (similar to Figma), ensuring sub-100ms sync via MongoDB change streams.

3. Team Enablement & Product Impact

- Mentored 15+ engineers on React best practices at Biophy, implementing design systems that boosted feature velocity by 40%.
- Partnered with product teams at Oracle to launch AI-powered presentation tools (e.g., auto-layout engines), increasing user engagement by 25%.

4. Stack Expertise

- *React/TypeScript*: Built dynamic JSON-to-PDF resume generator with SVG rendering (personal project).

- *Node.js/MongoDB*: Scaled ad-tech analytics at Spotify using similar GCP services (App Engine/PostgreSQL).

Why Beautiful.ai?

I share your passion for visual storytellingmy open-source projects prove it! As a pickleball enthusiast, I deeply connect with your teams collaborative spirit. Im eager to bring my blend of technical rigor (e.g., Webpack tuning) and product empathy to help users "tell stories that win."

Ive attached my resume with further details on SVG performance optimizations and microservice architectures. I would welcome the chance to discuss how I can strengthen Beautiful.ais engineering foundation. Please contact me at 856-408-4027 or rongyj@hotmail.com to schedule a conversation.

Sincerely,
Yongjun Rong
