Subject: Application for Senior DevSecOps Engineer Securing Innovation at Scale Dear Gong.io Hiring

Team,

As a DevSecOps leader with over ten years of experience hardening cloud infrastructure and building security-automated pipelines for high-growth SaaS environments, I'm excited to apply for your Senior DevSecOps Engineer role. My background aligns perfectly with Gong's mission, particularly my work securing AWS environments, implementing GitOps at scale, and leading US-based teams to embed security into CI/CD. I'm confident I can fortify your revenue platform while accelerating innovation.

Here's how I address Gong's core needs:

1. Security-Hardened Cloud Infrastructure (AWS)

- At Biophy, engineered a zero-trust AWS environment using IAM/KMS/GuardDuty, reducing security incidents by 90% via Terraform-driven policies and automated compliance checks (SOC 2 alignment).
- Scaled EKS clusters with CIS-hardened configurations (McKinsey), implementing runtime security via Falco and Kyverno policies.

2. DevSecOps Automation & CI/CD

- Integrated vulnerability scanning (Trivy/Snyk) into GitHub Actions pipelines at Yotascale, blocking 200+ critical CVEs monthly.
- Built security-as-code frameworks using Crossplane/Terraform to enforce guardrails for 300+ cloud resources (Barclays).

3. Leadership & Global Collaboration

- Led US-based DevOps teams (Comcast, McKinsey), mentoring engineers on Kubernetes security and incident response.
- Partnered with security/compliance teams to automate audit evidence collection for SOC 2/ISO 27001, reducing manual effort by 70%.

4. Tech Stack Expertise

- *AWS Security Hub/CloudTrail*: Centralized threat detection for 50+ accounts.
- *Java Environments*: Secured SpringBoot apps via secrets rotation (Vault) and RASP tools.

- *Observability*: Built Prometheus/Grafana dashboards for container security KPIs.
- *Certifications*: AWS Certified Security Specialty (expired but knowledge-current).

Why Gong?

Im inspired by your vision to transform revenue intelligence. My experience securing revenue-critical platforms ensures I can protect Gongs infrastructure while enabling R&D velocity. As a leader who thrives in fast-paced environments, Im eager to build your US DevSecOps function and partner with global teams to scale securely.

Ive attached my resume detailing security automation wins and would welcome a discussion on fortifying Gongs cloud strategy. Please contact me at 856-408-4027 or rongyj@hotmail.com to schedule a conversation.

Sincerely,
Yongjun Rong
